Data Dictionary and Variable List
for WFPICCS 2026 Datathon**

ANZICS Paediatric Intensive Care Registry

Data Set Variables

The ANZPIC Registry's dataset for this datathon is a dataset of paediatric ICU admissions in Australia & New Zealand for the period from 1 July 2016 to 31 December 2025 (10 Years) based on the ICU admission date. These represent all admissions to the specialist Paediatric Intensive Care Units (PICUs) aged ≤ 18 years as well as children < 16 years admitted to other General ICUs for this period.

Basic demographics, severity of illness (PIM3, PIM2 RODs), diagnoses, therapies, interventions, and outcomes are available for each ICU admission. Any data field values that are missing, not available or not measurable are identified by the value NULL.

The dataset comprises of three (3) files – an admissions file (ANZPICR_ADM), an episodes file (ANZPICR_EPI) and an associated diagnosis file (ANZPICR_DIAG). Each row in the admissions file represents one ICU admission. Each row in the episodes file represents one episode of a defined list of interventions (mainly respiratory) which occurred during each of the ICU admissions. Each row in the associated diagnosis file represents one or more associated diagnoses recorded for each ICU admission.

DSiteID and ICU_NO identifiers can be used to link records across the three data files. DURNo identifies a unique patient at a given ICU.

To meet privacy requirements, no patient or hospital identifying information is included. Dummy site id numbers and patient MRNs have been used.

Paediatric Registry Admissions (ANZPICR_ADM)

Variable	Description
Dummy Site ID: DSitID	De-identified SiteID
ANZPIC Registry ICU Number: ICU_NO	An 8 to 10 digit sequential number where the first 4 digits are usually the year of admission, and the last 4 to 6 digits are a sequential admission count for the year. (e.g. 20180099 or 2018000099 is the 99th ICU admission in the year 2018)
Medical Record Number/ Unit Record Number: DURNo	De-identified unique MRN for a patient in a given ICU
Year and month of ICU admission: ICUAdmYYYYMM	The year and month of admission to the ICU (YYYYMM) e.g. 202001
Year of ICU admission: ICUAdmYear	The year of admission to the ICU (YYYY) e.g. 2020
Month of ICU admission: ICUAdmMonth	Month of ICU admission (MM) e.g. 12
Day of ICU admission: ICUAdmDay	Day of ICU admission (DD) e.g. 31
Hour of ICU admission: ICUAdmHour	Hour of ICU admission (HH) e.g. 23
Date & Hour of ICU admission: ICUAdmDHR	Date and hour of ICU admission (YYYY-MM-DD HH:MM:SS) e.g. 2020-12-31 23:00:00
Year of ICU discharge: ICUDisYear	Year of discharge from the ICU (YYYY) e.g. 2020
Month of ICU discharge: ICUDisMonth	Month of discharge from the ICU (MM) e.g. 12
Hour of ICU discharge: ICUDisHour	Hour of discharge from the ICU (HH) e.g. 23
Date & Hour of ICU discharge: ICUDisDHR	Date and hour of ICU discharge (YYYY-MM-DD HH:MM:SS) e.g. 2020-12-31 23:00:00
ICU hours: ICU_HRS	Length of ICU stay in hours (to 2 decimal places)
ICU Outcome: OUTCOME	Indicator of outcome of ICU episode and destination on discharge from ICU 1 Discharged to ward or home 2 Died in ICU 3 Transferred to NICU or other ICU 4 Still in ICU 5 Died within 24 hours after being discharged from ICU for palliative care
Readmitted to ICU: READMITTED	Indicator of whether this ICU admission is a readmission during the same hospital admission. 0 Not a readmission 1 Readmission
Readmission Lag Hours: READMISSION_LAG_HRS	If READMITTED=1, this field records the number of hours (to 2 decimal places) between the prior ICU discharge time and this ICU admission time.
Year of Hospital admission: HospAdmYear	The year of admission to the hospital (YYYY) e.g. 2020
Month of Hospital admission: HospAdmMonth	The year of admission to the hospital (MM) e.g. 12
Day of Hospital admission: HospAdmDay	Day of admission to the hospital (DD) e.g. 31
Hour of Hospital admission: HospAdmHour	Hour of admission to the hospital (HH) e.g. 23
Date & Hour of Hospital admission: HospAdmDHR	Date and hour of hospital admission (YYYY-MM-DD HH:MM:SS) e.g. 2020-12-31 23:00:00
Year of Hospital discharge: HospDisYear	The year of discharge from the hospital (YYYY) e.g. 2020
Month of Hospital discharge: HospDisMonth	The month of discharge from the hospital (MM) e.g. 12
Day of Hospital discharge: HospDisDay	The day of discharge from the hospital (DD) e.g. 31
Hour of Hospital discharge: HospDisHour	The hour of discharge from the hospital (HH) e.g. 23

Paediatric Registry Admissions (ANZPICR_ADM)

Variable	Description
Date & Hour of Hospital discharge: HospDisDhr	Date and hour of hospital discharge (YYYY-MM-DD HH:MM:SS) e.g. 2020-12-31 23:00:00
Hospital Outcome: HOSP_OUT	The status of the patient at discharge/separation from the hospital 1 Still in hospital 2 Died 3 Discharged home 4 Transferred to a rehabilitation hospital 5 Transferred to other hospital ICU or NICU 6 Transferred to other hospital ward
Hours Prior to ICU admission: PRE_ICU_HRS	Number of hours (to 2 decimal places) between hospital admission time and ICU admission time.
Sex: SEX Codes I, U introduced 2017	Sex of the patient M Male F Female I Intersex/Indeterminate U Unknown
Age in years: AGE	Age in years
Indigenous Status: IND_STATUS	The indigenous status of the patient, as identified by the patient's next of kin 0 Not indigenous 1 Indigenous Australia: person who identifies as Aboriginal or Torres Strait Islander (TSI) New Zealand: person who identifies as Māori
Weight: WT	The weight of the patient on admission, measured in kilograms to the nearest 0.1 kg.
Hospital Admission Source: HADM_SC	The location from where the patient was admitted to hospital 1 Home/scene: admitted from home or the scene of an injury 2 Other Hospital - Emergency Department: patient transferred from the Emergency Department of another hospital 3 Other Hospital - OT/Recovery: patient transferred from the operating theatre or recovery room of another hospital 4 Other Hospital - ICU/NICU: patient transferred from the intensive care unit or neonatal intensive care unit of another hospital 5 Other Hospital – Ward: patient transferred from any other inpatient area of another hospital 6 Inborn: patient was born at the hospital housing the ICU
Retrieval: RETRIEV	An indicator of whether a patient is transported to the ICU by a specialist paediatric ICU retrieval/transport team or equivalent 0 No 1 Yes
ICU Admission Source: IADM_SC Code 6 introduced 2018	The location from where the patient was directly admitted to ICU 1 OT/Recovery: patient admitted to ICU from the operating theatre or recovery room 2 Emergency Department: patient admitted to ICU from the emergency department

Paediatric Registry Admissions (ANZPICR_ADM)

Variable	Description
	3 Ward: patient admitted to ICU from any other inpatient area. 4 Other ICU/NICU Same Hospital: patient admitted to ICU from another ICU or NICU within the same hospital 5 Direct ICU Admission: patient admitted directly to ICU, for example following retrieval 6 OT via another ICU/NICU: patient transferred directly to OT from another ICU/NICU and then admitted to ICU following a surgical procedure. (This code is to allow for differentiation in administrative practices at some sites, usually related to neonatal cardiac surgery)
Unplanned ICU Readmission During this Hospital Admission: UNPL_READ	Indication of unexpected readmission to ICU within 72 hours of discharge from a previous ICU admission during the same hospital admission 0 No 1 Yes - unplanned readmission <72 hours post discharge from ICU
Principal ICU Diagnosis: PDX	The principal diagnosis most directly responsible for the ICU admission. See ANZPICR Diagnosis Code List.
Underlying Diagnosis: UDX	The underlying diagnosis which has contributed to the need for ICU admission. The UDX may be the same as the PDX e.g., meningitis in a previously well patient. If the PDX is an operative procedure, the UDX will be the condition underlying the need for surgery. See ANZPICR Diagnosis Code List.
Systolic Blood Pressure: SBPA	The systolic blood pressure measured in mmHg NULL – not measured/available within first hour of ICU
PaO₂: PO2A	The partial pressure of oxygen measured in mmHg, from an arterial blood sample. Used to calculate PaO₂/FiO₂ ratio NULL – not measured/available within first hour of ICU
FiO₂: FIO2A	The fraction of inspired oxygen being delivered to the patient via endotracheal tube (ETT), non-invasive ventilation (NIV), high flow nasal cannula (HFNC) or headbox at the same time as the PaO₂ is measured. If PaO₂ is unknown or not measured, then FiO₂ will usually also be unknown or not measured
Base Excess: BEA	The base excess measured in arterial, capillary or venous blood, in mmol/l NULL – not measured/available within first hour of ICU
Source of Base Excess measurement: BE_SOURCE	Indicator of the source of the base excess (BE) measurement 0 No BE measurement 1 Arterial 2 Capillary 3 Venous 9 Unknown
Inotropes: INOTROPES	Indicator of whether the patient received inotrope therapy at any time during the ICU admission 0 None 1 Commenced within 1st hour of admission 2 Commenced > 1st hour of admission

Paediatric Registry Admissions (ANZPICR_ADM)

Variable	Description
Lactate: LACTATE	Blood lactate concentration measured in mmol/l NULL – not measured/available within first hour of ICU
SpO₂: SPO2	Oxygen saturation level percentage as measured by pulse oximetry NULL – not measured/available within first hour of ICU
FiO₂ for SpO₂: FIO2_SAT	The fraction of inspired oxygen delivered to the patient via endotracheal tube (ETT), non-invasive ventilation (NIV), high flow nasal cannula (HFNC) or headbox and measured at the same time as SpO ₂ . If SpO ₂ is unknown or not measured, then FiO ₂ will usually also be unknown or not measured.
Place of first face to face contact: FST_CONT	The place of first face-to-face contact between the patient and a doctor from your ICU or from a specialist paediatric transport team when management of the patient is taken over 1 Your ICU 2 In your hospital but outside ICU 3 Outside your hospital
Mechanical Ventilation in first hour: RS_HR124	Indication of whether the patient was mechanically ventilated within the first hour of admission to ICU. Mechanical ventilation includes both invasive (ETT or tracheostomy), and non-invasive (nasopharyngeal airway, mask or nasal prongs), methods of augmenting work of breathing. Using conventional mechanical ventilation (CVM), continuous positive airway pressure (CPAP), biphasic positive airway pressure (BiPAP), or negative pressure ventilation (NPV). High Flow via nasal cannulae (HFNC) is NOT considered mechanical ventilation for this field. 0 No 1 Yes
Pupillary Responses to bright light: PUPILS	The pupillary reactions to bright light. Abnormal findings due to drugs, toxins, or local eye injury are not recorded 0 All other responses including reactive and unknown 1 Both fixed and dilated > 3mm
Elective: ELECTIVE	An ICU admission or an operation is considered elective if it was planned or foreseeable, and could have been postponed for more than six hours without an adverse effect. <i>Note that unexpected admissions (i.e., not planned and could not have been foreseen) after elective surgery are not considered Elective.</i> 0 Non-elective - all other admissions 1 Elective - includes booked ICU admission after elective surgery, for an ICU procedure (for example central line insertion), for diagnostic monitoring or review of home ventilation
Recovery from surgery: RECOVERY	Indication of admission for recovery from surgery or procedure, including radiology procedure or cardiac catheter. Does not include patients admitted from the operating theatre where recovery from surgery is not the main reason for ICU admission. 0 No

Paediatric Registry Admissions (ANZPICR_ADM)

Variable	Description
	1 Yes
Cardiac bypass: BYPASS	Indication of cardiac bypass prior to, or during, ICU admission 0 No 1 Admitted following cardiac bypass 2 Bypass procedure during ICU admission 3 Both 1 & 2 apply
Chronic Condition – Neurologic or Neuromuscular: CC_NEURO Field introduced 2017	A chronic medical condition that can be reasonably expected to last at least 12 months (unless death intervenes) and to involve either several different organ systems or one organ system severely enough to require specialty paediatric care and probably some period of hospitalization in a tertiary care centre. 0 No 1 Yes
Chronic Condition – Respiratory: CC_RESP Field introduced 2017	
Chronic Condition – Gastrointestinal: CC_GASTRO Field introduced 2017	
Chronic Condition – Metabolic: CC_METABOL Field introduced 2017	
Chronic Condition – Malignancy: CC_MALIG Field introduced 2017	
Chronic Condition – Technology Dependency: CC_TECHDEP Field introduced 2017	
Chronic Condition – Cardiovascular: CC_CARDIO Field introduced 2017	
Chronic Condition – Renal or Urologic: CC_RENAL Field introduced 2017	
Chronic Condition – Haematologic or Immunologic: CC_HAEM Field introduced 2017	
Chronic Condition – Other Congenital or Genetic Defect: CC_CONGEN Field introduced 2017	
Chronic Condition – Premature/Neonatal: CC_PREM Field introduced 2017	
Chronic Condition – Transplantation: CC_TRANSPL Field introduced 2017	
Chronic Condition – Mental Health / Behavioural: CC_MENTALH Field introduced 2020	
PIM3 Low Risk Diagnosis: PIM3_LR	Specific conditions associated with reduced mortality risk for PIM2 and PIM3 models 0 None 1 Asthma is the main reason for ICU admission 2 Bronchiolitis is the main reason for ICU admission 3 Croup is the main reason for ICU admission

Paediatric Registry Admissions (ANZPICR_ADM)

Variable	Description
	4 Obstructive sleep apnoea (OSA) is the main reason for ICU admission. Includes admissions following adenoidectomy and/or tonsillectomy where OSA is the main reason for ICU admission 5 Diabetic keto-acidosis is the main reason for ICU admission 6 Seizures is the main reason for ICU admission
PIM3 High Risk Diagnosis: PIM3_HR	Specific conditions associated with increased mortality risk for PIM3 model 0 None 1 Spontaneous cerebral haemorrhage 2 Cardiomyopathy or myocarditis 3 Hypoplastic left heart syndrome (HLHS) 4 Neurodegenerative disorder 5 Septic shock, as defined by the International Pediatric Sepsis Consensus Conference, 2002. Requires the presence of the systemic inflammatory response syndrome (SIRS) and suspected or proven infection and cardiovascular organ dysfunction. 6 Necrotising enterocolitis (NEC) is the main reason for ICU admission
PIM3 Very High Risk Diagnosis: PIM3_VHR	Specific conditions associated with increased mortality risk for PIM3 model 0 None 1 Cardiac arrest preceding ICU admission 2 Severe combined immune deficiency (SCID) 3 Leukaemia or lymphoma after 1st induction 4 Bone marrow transplant (BMT) recipient 5 Liver failure - acute or chronic, is the main reason for ICU admission 6 Code no longer in use: Necrotising enterocolitis (NEC) 7 SCID and BMT recipient 8 Leukaemia or lymphoma after 1st induction and BMT recipient
CVVH or CVVHD: CVVH	Indicator of whether the patient received continuous haemofiltration during the ICU admission 0 No 1 Yes
Haemodialysis: HD	Indicator of whether the patient received intermittent haemodialysis during the ICU admission 0 No 1 Yes
Peritoneal dialysis: PD	Indicator of whether the patient received peritoneal dialysis at any time during the ICU admission 0 No 1 Yes
Plasma exchange: PF	Indicator of whether the patient received plasma exchange at any time during the ICU admission 0 No 1 Yes

Paediatric Registry Admissions (ANZPICR_ADM)

Variable	Description
High frequency oscillation: HFO	Indicator of whether the patient received high frequency oscillation (HFO) therapy during the ICU admission 0 No 1 Yes
Inhaled nitric oxide: INO	Indicator of whether the patient received inhaled nitric oxide therapy at any time during the ICU admission 0 No 1 Yes
ECMO: ECMO	Indicator of whether the patient received extra corporeal membrane oxygenation (ECMO) therapy at any time prior to or during the ICU admission 0 No 1 Yes – commenced prior to ICU admission 2 Yes – commenced during this ICU admission
Ventricular assist device: VAD	Indicator of whether the patient received support from a ventricular assist device (VAD) at any time prior to or during the ICU admission 0 No 1 Yes – commenced prior to ICU admission 2 Yes – commenced during this ICU admission
ICP Monitoring: ICPM	Indicator of whether the patient had an intracranial pressure monitor inserted at any time during the ICU admission 0 No 1 Yes
Indication for ECLS (ECMO & VAD): ECLS_IND	Identifies the reason for ECMO or VAD. Note if more than one code applies, the lowest number is recorded 0 None 1 Cardiac surgery 2 Cardiac support (not post cardiac surgery) 3 Cardiac arrest 4 Septic shock 5 Pneumonia 6 ARDS (not associated with pneumonia) 7 Neonatal respiratory failure 8 Other
ECMO for ECPR: ECPR Field introduced 2017	Indicates if extracorporeal life support conducted for cardiac arrest, was extracorporeal membrane oxygenation conducted for extracorporeal cardiopulmonary resuscitation 0 No 1 Yes Mandatory, if field ECLS_IND is coded 3, indicating cardiac arrest
Time to Cannulation: CANN_TIME Field introduced 2017	The time in minutes from arrest to cannulation if extracorporeal cardiopulmonary resuscitation conducted
Gestational age at delivery in weeks if patient is ≤ 1 year old at ICU admission: GESTATION	If < 37 completed gestational weeks and < 12 months of age at time of ICU admission, enter the number of completed weeks of gestation. If ≥ 37 completed gestational weeks or >12 months of age at time of ICU admission, gestational weeks as 40.

Paediatric Registry Admissions (ANZPICR_ADM)

Variable	Description
Gestation (completed weeks) for patient < 28 days corrected: GEST_WEEKS Field introduced 2019	The patient's gestational age in completed weeks at delivery if patients < 28 days corrected age Permissible values: 20 – 43 (weeks), Null for missing/null value
Gestation (additional days) for patient < 28 days corrected: GEST_DAYS Field introduced 2019	Number of additional days beyond completed weeks of gestational age at delivery if the post menstrual age is < 44 weeks (i.e. corrected age < 28 days) at admission to ICU Permissible values: 0 – 6 (days), 9 (if unknown); Null for missing/null value
Antenatal Diagnosis of Major Structural Anomaly: AD_STAN	Indicator of whether patient was diagnosed antenatally with a major structural anomaly 0 No 1 Yes
Cardiac Surgery Performed: CARDIAC	Specifies whether cardiac surgery was performed at any time before and/or during the current ICU admission 0 No 1 Immediately prior to this ICU admission 2 During current ICU admission 3 Both 1 & 2 apply
Intubation Hours: INTUB_HRS	Total hours (to 2 decimal places) of any intubation episodes 0.00 or NULL = no intubation hours
Mechanical Ventilation Hours: MECHVENT_HRS	Total hours (to 2 decimal places) of any mechanical ventilation (invasive + non-invasive) episodes 0.00 or NULL = no mechanical ventilation hours
Respiratory Support Hours: RESPSUPP_HRS	Total hours (to 2 decimal places) of all respiratory support (invasive vent + non-invasive vent + HFNC) episodes 0.00 or NULL = no respiratory support hours
Invasive Ventilation Hours: INV_HRS	Total hours (to 2 decimal places) of any invasive ventilation episodes 0.00 or NULL = no invasive ventilation hours
Non-invasive Ventilation Hours: NONINV_HRS	Total hours (to 2 decimal places) of any non-invasive ventilation episodes 0.00 or NULL = no non-invasive ventilation hours.
HFNC Hours: HFNC_HRS	Total hours (to 2 decimal places) of any HFNC episodes 0.00 or NULL = no HFNC hours
ECLSHours: ECLS_HRS	Total hours (to 2 decimal places) of any ECLS (ECMO and/or VAD) episodes 0.00 or NULL = no ECLS hours.
ICU Admission following RRT/MET response call: RRT_adm Field introduced 2017	Indication of ICU admission following Rapid Response Team (RRT) / Medical Emergency Team (MET) / emergency response call in a ward or inpatient area 0 No 1 Yes – RRT/MET/Code Blue call
Mechanical Ventilation start: MECHVENTSTART	Number of hours (to 2 decimal places) after ICU admission that an episode of mechanical ventilation started 0.00 = was mechanically ventilated on ICU admission NULL = no mechanical ventilation episode
First Ventilation Type: FIRSTVENT	Indicator of modality of first ventilation 1 Invasive Ventilation

Paediatric Registry Admissions (ANZPICR_ADM)

Variable	Description
	2 Non-invasive Ventilation3 HFNC
Died in ICU: DIED_IN_ICU	Indicator of death in ICU (or within 24 hours when discharged for palliative care). i.e. OUTCOME = 2 or 5 0 No 1 Yes - Death in ICU
Died in Hospital: DIED_IN_HOSP	Indicator of death in hospital i.e. HOSP_OUT = 2 0 No 1 Yes - Death in hospital
Mode of Death: DEATH_MODE	Identifies the mode of death if patient died in ICU 1 Brain death 2 Death with maximal support 3 Death with therapy limited but not withdrawn 4 Death with therapy withdrawn (not brain death)
Limitation of Therapy: LIMIT	Identifies whether there was a limitation of therapy order documented in the patient's medical record 0 No 1 Yes
Organ Donation: ORG_DON Codes 8 & 9 added 2018	Identifies whether the deceased patient was an organ donor 1 Brain death not present (DCD not considered) 2 Brain death, organ donor 3 Brain death, contraindication to organ donation 4 Brain death, consent not requested 5 Brain death, consent requested and refused 6 Donation after Cardiac Death (DCD) 7 DCD, consent requested and refused 8 DCD, consented but did not donate 9 Brain death, consented but did not donate
Principal Cause of Death: CAUSE_DEATH Field introduced 2017	The principal diagnostic reason for the cause of death. See ANZPICR Diagnosis Code List.
Date of Death: DEATH_DATE	Date of death (dd/mm/yyyy) from AIHW National Death Index. Note that this date is linked to a patient, not the ICU admission. Multiple ICU admission for the same patient uniquely identified by DSLK581 will have the same DEATH_DATE recorded.
PIM2 Risk of Death: PIM2RoD	PIM2 Risk of Death (to 6 decimal places). e.g. 0.012345 = 1.2345%, 0.987654 = 98.7654%
PIM3 Risk of Death: PIM3RoD	PIM3 Risk of Death (to 6 decimal places). e.g. 0.012345 = 1.2345%, 0.987654 = 98.7654%
PIM3 Risk of Death: PIM3anz13RoD	PIM3 Risk of Death ANZ 2013 recalibrated (to 6 decimal places). e.g. 0.012345 = 1.2345%, 0.987654 = 98.7654%
PIM3 Risk of Death: PIM3anz15RoD	PIM3 Risk of Death ANZ 2015 recalibrated (to 6 decimal places). e.g. 0.012345 = 1.2345%, 0.987654 = 98.7654%
De-identified post code: DPOSTCODE	De-identified postcode
De-identified linkage key: DSLK581	De-identified SLK581. A unique patient identifier across ICUs and datasets

EPISODES FILE

This data indicates the type, dates and times of specific interventions provided to the patient in ICU.

DSiteID and ICU_NO identifiers can be used to link episode of intervention records with the ICU admission data file (ANZPICR_ADM). DURN identifies a unique patient at a given ICU.

Invasive ventilation (IV) is mechanical ventilation delivered via ETT or Tracheostomy.

Non-invasive ventilation (NIV) refers to CPAP, BiPAP or NPV delivered by Mask, Nasal Prong, or Cuirass.

High Flow Nasal Cannulae (HFNC) is regarded as high-flow, threshold must be >1L/Kg/min or >30L/min

Intubation refers to ETT or tracheostomy.

A respiratory support episode (IV, NIV or HFNC) includes any breaks of <24hrs. Recommencing a mode of respiratory support after stopping for longer than 24 hours is regarded as a new episode.

If a respiratory support episode is a mixture of modalities e.g. HFNC used during the day and CPAP/BiPAP at night, or a failed extubation where non-invasive ventilation has been used for a short length of time between intubations, the episode assigned is the most invasive modality. Where respiratory support is a consecutive process involving the stepping down or up of modalities e.g. weaning, these are recorded as separate episodes.

All episodes of intubation and ECLS are to be recorded, irrespective of breaks of any length in time.

All episodes of intubation require a description of the extubation. If still intubated on ICU discharge or death, code 8 (No extubation) is used. If extubated as part of end of life care, then code 1 (Planned, successful) is used.

Paediatric Registry Episodes (ANZPICR_EPI)

Variable	Description
Dummy Site ID: DSiteID	De-identified SiteID
ANZPIC Registry ICU Number: ICU_NO	An 8 to 10 digit sequential number where the first 4 digits are usually the year of admission, and the last 4 to 6 digits are a sequential admission count for the year. (e.g. 20180099 or 2018000099 is the 99th ICU admission in the year 2018)
Medical Record Number/ Unit Record Number: DURN	De-identified unique MRN for a patient in that ICU
Episode Category: EPI_CAT	Indicator of the mode of respiratory intervention 1 Invasive Ventilation - mechanical ventilation delivered via ETT or Tracheostomy 2 Non-Invasive Ventilation - refers to CPAP, BiPAP or NPV delivered by Mask, Nasal Prong, or Cuirass 3 High Flow Nasal Cannulae (HFNC) - to be regarded as high-flow, threshold must be >1L/Kg/min or >30L/min 4 Intubation - refers to ETT or tracheostomy 5 Extracorporeal life support (ECLS)
Episode START post admission: Episode_post_adm	Number of hours (to 2 decimal places) after ICU admission that an intervention episode started 0.00 = episode started on or prior to admission
Episode length: EPISODE_HRS	Length in hours (to 2 decimal places) of intervention episode
Extubation description: Extub	Description of the extubation associated with all intubation episodes. 1 Planned, successful 2 Planned, successful, but with planned reintubation 3 Planned, failed* (upper airway obstruction) 4 Planned, failed* (respiratory failure/lung disease) 5 Planned, failed* (other) 6 Unplanned, (but) successful 7 Unplanned, failed* 8 No extubation 9 Not applicable (default code that will apply to all other non-intubation episode categories)

ASSOCIATED DIAGNOSIS FILE

This data indicates the associated diagnoses linked to an ICU admission. DSiteID and ICU_NO identifiers can be used to link associated diagnosis records with the ICU admission data file (ANZPICR_ADM). DURNo identifies a unique patient at a given ICU. An unlimited number of associated diagnoses can be reported per ICU admission. Associated diagnoses include procedures, adverse events and morbidities of interest that are pre-existing or occurring on or during the ICU admission in addition to the principal reason for admission to ICU.

Paediatric Registry Associated Diagnosis (ANZPICR_DIAG)	
Variable	Description
Dummy Site ID: DSiteID	De-identified Site ID
ANZPIC Registry ICU Number: ICU_NO	An 8 to 10 digit sequential number where the first 4 digits are usually the year of admission, and the last 4 to 6 digits are a sequential admission count for the year. (e.g. 20180099 or 2018000099 is the 99th ICU admission in the year 2018)
Medical Record Number/ Unit Record Number: DURNo	De-identified unique MRN for a patient in that ICU
Associated Diagnosis: ADX	Associated diagnosis. See ANZPICR Diagnosis Code List
Associated Diagnosis Category: ADX_CAT Field introduced June 2021	Timing of all relevant associated diagnoses: 1 Pre-existing 2 Acute (on ICU admission) 3 ICU occurrence (during ICU admission) 9 Not coded
Associated Diagnosis Date and Hour: ADX_DHr Field introduced June 2021	Date and hour of ADX (YYYY-MM-DD HH:MM:SS) e.g. 2020-12-31 23:00:00 ADX Date & Hour can be entered for all ADX records but it is not mandatory unless ADX_CAT = 3 (ICU occurrence) and ADX is a post procedural diagnosis (codes between 1000 and 1999).

ANZPICR DIAGNOSIS CODE LIST

This list details the diagnosis group and description for the diagnosis codes used for coding the principal diagnosis (PDX), underlying diagnosis (UDX), associated diagnosis (ADX), and cause of death (CAUSE_DEATH).

Paediatric Registry Diagnosis Code List		
Diagnosis Code	Diagnosis Group	Diagnosis Description
100	Injury	Injury - Other
101	Injury	Anaphylaxis
102	Injury	Burns
103	Injury	Carbon Monoxide Poisoning
104	Injury	Drug Toxicity - Iatrogenic
105	Injury	Electrocution
106	Injury	Envenomation (OBSOLETE)
107	Injury	Hanging or Strangulation
108	Injury	Hyperthermia
109	Injury	Hypothermia
110	Injury	Immersion
111	Injury	Ingestion (OBSOLETE)
112	Injury	Smoke Inhalation
113	Injury	Trauma - Other
114	Injury	Trauma - Abdominal
115	Injury	Trauma - Chest
116	Injury	Trauma - Facial
117	Injury	Trauma - Head
118	Injury	Trauma - Skeletal
119	Injury	Trauma - Spinal
121	Injury	Ingestion - Drug
122	Injury	Ingestion - non drug
123	Injury	Envenomation (sting) - marine
124	Injury	Envenomation (bite) - snake
125	Injury	Envenomation (Bite) - Spider (OBSOLETE)
126	Injury	Envenomation (Bite) - Tick (OBSOLETE)
127	Injury	Envenomation - not elsewhere specified
128	Injury	Pressure Injury
129	Injury	Extravasation Injury
150	Injury	Injury Mechanism - Other
151	Injury	Cyclist
152	Injury	Fall
153	Injury	Farm Equipment
154	Injury	Firearm Injury
155	Injury	MVA - Passenger
156	Injury	MVA - Pedestrian
157	Injury	Non Accidental Injury
158	Injury	Self Injury
159	Injury	Sports Injury
160	Injury	Stab Injury

Paediatric Registry Diagnosis Code List

Diagnosis Code	Diagnosis Group	Diagnosis Description
161	Injury	Motor Bike Rider / Passenger
162	Injury	Crush Injury
163	Injury	MVA - Driveway Pedestrian
164	Injury	Horse Related Injury
200	Cardiovascular	Cardiovascular - Congenital - Other
201	Cardiovascular	Absent Pulmonary Valve
202	Cardiovascular	Anomalous Coronary Artery
203	Cardiovascular	Aortic Insufficiency
204	Cardiovascular	Aortic Stenosis
205	Cardiovascular	ASD secundum/sinus venosus ASD/PFO
206	Cardiovascular	AVSD – Complete/Transitional (w VSD component)
207	Cardiovascular	Coarctation
208	Cardiovascular	Cortriatriatum
209	Cardiovascular	Ebstein’s Anomaly
210	Cardiovascular	Hypoplastic Left Heart Syndrome
211	Cardiovascular	Interrupted or Hypoplastic Aortic Arch
212	Cardiovascular	Mitral Insufficiency
213	Cardiovascular	Mitral Stenosis
214	Cardiovascular	PDA
215	Cardiovascular	Pulmonary Atresia or Stenosis
216	Cardiovascular	Single Ventricle
217	Cardiovascular	TAPVD
218	Cardiovascular	Tetralogy of Fallot
219	Cardiovascular	Transposition of Great Arteries (dTGA)
220	Cardiovascular	Tricuspid Atresia or Stenosis
221	Cardiovascular	Tricuspid Insufficiency
222	Cardiovascular	Truncus Arteriosis
223	Cardiovascular	VSD
224	Cardiovascular	AP Window
225	Cardiovascular	AV Malformation
226	Cardiovascular	Double Outlet Right Ventricle
227	Cardiovascular	LV Outflow Obstruction
228	Cardiovascular	Pulmonary Insufficiency
229	Cardiovascular	RV Outflow Obstruction
230	Cardiovascular	Cardiovascular - Congenital - Post Palliation
231	Cardiovascular	Hypoplastic LV (not HLHS)
232	Cardiovascular	Hypoplastic RV
233	Cardiovascular	l-TGA (Levo-Transposition of Great Arteries)
234	Cardiovascular	ASD – Primum/Partial AVSD (no VSD component)
235	Cardiovascular	MAPCAs
236	Cardiovascular	PAPVD
237	Cardiovascular	Double Inlet Left Ventricle
250	Cardiovascular	Cardiovascular - Acquired - Other
251	Cardiovascular	Cardiac Failure

Paediatric Registry Diagnosis Code List

Diagnosis Code	Diagnosis Group	Diagnosis Description
252	Cardiovascular	Cardiac Tumour
253	Cardiovascular	Cardiomyopathy/Myocarditis
254	Cardiovascular	Dysrhythmia - Supraventricular
255	Cardiovascular	Dysrhythmia - Ventricular
256	Cardiovascular	Endocarditis
257	Cardiovascular	Hypertension - Pulmonary
258	Cardiovascular	Hypertension - Systemic
259	Cardiovascular	Kawasaki's Disease
260	Cardiovascular	Pericardial Effusion or Tamponade
261	Cardiovascular	Vascular Thrombosis - Other
262	Cardiovascular	Vasculitis
263	Cardiovascular	Previous Heart Lung Transplant (OBSOLETE)
264	Cardiovascular	Previous Heart Transplant
265	Cardiovascular	Rheumatic Heart Disease
266	Cardiovascular	Previous Cardiac Surgery
267	Cardiovascular	Pulmonary Embolism
268	Cardiovascular	Myocardial Infarction/Ischaemia
269	Cardiovascular	Heart Block
270	Cardiovascular	Blocked Aorto-Pulmonary Shunt
271	Cardiovascular	Dysrhythmia Requiring Intervention
272	Cardiovascular	Vascular Thrombosis - Vascular Access Device Related
300	Neurological	Neurological - Other
301	Neurological	Botulism
302	Neurological	Brain Abscess
303	Neurological	Brain AV Malformation
304	Neurological	Brain Death
305	Neurological	Brain Infarction or Stroke
306	Neurological	Brain Tumour
307	Neurological	CSF Shunt Malfunction or Infection
308	Neurological	Encephalitis
309	Neurological	Encephalopathy Acute - Hypoxic Ischaemic
310	Neurological	Encephalopathy Acute - Other
311	Neurological	Encephalopathy Chronic Degenerative
312	Neurological	Encephalopathy Chronic Static
313	Neurological	Guillain Barre Syndrome
314	Neurological	Hydrocephalus
315	Neurological	Intracranial Haemorrhage - Non-Traumatic
316	Neurological	Intracranial Hypertension
317	Neurological	Meningitis
318	Neurological	Meningomyelocele or Spina Bifida
319	Neurological	Myopathy
320	Neurological	Neuropathy
321	Neurological	Seizures
322	Neurological	Spinal Cord Lesion

Paediatric Registry Diagnosis Code List

Diagnosis Code	Diagnosis Group	Diagnosis Description
323	Neurological	Venous Sinus Thrombosis
324	Neurological	Cerebral Aneurysm
325	Neurological	Muscular Dystrophy
326	Neurological	Myasthenia Gravis
327	Neurological	Tetanus
328	Neurological	Arnold Chiari Malformation
329	Neurological	Brain Cyst
330	Neurological	Epilepsy (comorbidity)
331	Neurological	Cerebral Oedema
332	Neurological	Intracranial Haemorrhage - Traumatic
333	Neurological	Acute Disseminated Encephalomyelitis (ADEM)
334	Neurological	Congenital Brain Anomaly
335	Neurological	Febrile Convulsion
336	Neurological	Transverse Myelitis (TM)
337	Neurological	Spinal Muscular Atrophy
400	Respiratory	Upper Airway - Other
401	Respiratory	Choanal Atresia or Stenosis
402	Respiratory	Epiglottitis
403	Respiratory	Foreign Body - Inhaled
404	Respiratory	Laryngotracheobronchitis
405	Respiratory	Obstructive Sleep Apnoea
406	Respiratory	Pierre Robin Syndrome
407	Respiratory	Retropharyngeal Abscess
408	Respiratory	Subglottic Stenosis
409	Respiratory	Tracheitis
410	Respiratory	Upper Airway Obstruction - Other
411	Respiratory	Upper Respiratory Infection - Other
412	Respiratory	Vocal Cord Paresis
413	Respiratory	Subglottic Haemangioma
414	Respiratory	Laryngomalacia
415	Respiratory	Cleft Palate
430	Respiratory	Lower Airway - Other
431	Respiratory	Asthma
432	Respiratory	Bronchiolitis
433	Respiratory	Chronic Lung Disease
434	Respiratory	Malacia - Trachea and/or Bronchi
435	Respiratory	Mediastinal Mass
436	Respiratory	Stenosis - Trachea and/or Bronchi
437	Respiratory	Tracheo-oesophageal Fistula
438	Respiratory	Vascular Ring
439	Respiratory	Bronchiectasis
450	Respiratory	Respiratory - Other
451	Respiratory	Air Leak Syndrome
452	Respiratory	Apnoea - Central

Paediatric Registry Diagnosis Code List

Diagnosis Code	Diagnosis Group	Diagnosis Description
453	Respiratory	ARDS
454	Respiratory	Aspiration
455	Respiratory	Chylothorax
456	Respiratory	Congenital Diaphragmatic Hernia
457	Respiratory	Congenital Lung Anomaly
458	Respiratory	Cystic Fibrosis
459	Respiratory	Empyema
460	Respiratory	Hyaline Membrane Disease
461	Respiratory	Hypoventilation - Central
462	Respiratory	Lung Abscess
463	Respiratory	Meconium Aspiration Syndrome
464	Respiratory	Pleural Effusion
465	Respiratory	Pneumonia or Pneumonitis
466	Respiratory	Pulmonary Hypoplasia
467	Respiratory	Pulmonary Oedema
468	Respiratory	Respiratory Failure
469	Respiratory	Lower Respiratory Infection - Other
470	Respiratory	Pertussis Syndrome
471	Respiratory	Previous Lung Transplant
472	Respiratory	Transient Tachypnoea of the Newborn
473	Respiratory	Atelectasis
474	Respiratory	Pulmonary Haemorrhage
500	Gastrointestinal / Renal	Renal - Other
501	Gastrointestinal / Renal	Haemolytic Uraemic Syndrome
502	Gastrointestinal / Renal	Nephrotic and/or Nephritic Syndrome
503	Gastrointestinal / Renal	Renal Failure - Acute
504	Gastrointestinal / Renal	Renal Failure - Chronic
505	Gastrointestinal / Renal	Previous Renal Transplant
506	Gastrointestinal / Renal	Urinary Tract Infection
507	Gastrointestinal / Renal	Hydronephrosis
600	Gastrointestinal / Renal	Gastrointestinal - Other
601	Gastrointestinal / Renal	Bowel Obstruction
602	Gastrointestinal / Renal	Colitis
603	Gastrointestinal / Renal	Gastroenteritis
604	Gastrointestinal / Renal	Gastrointestinal Haemorrhage
605	Gastrointestinal / Renal	Gastroschisis or Exomphalos
606	Gastrointestinal / Renal	Hepatitis
607	Gastrointestinal / Renal	Intussusception
608	Gastrointestinal / Renal	Liver Disorder - Other
609	Gastrointestinal / Renal	Liver Failure - Acute
610	Gastrointestinal / Renal	Liver Failure - Chronic
611	Gastrointestinal / Renal	Necrotising Enterocolitis
612	Gastrointestinal / Renal	Oesophageal Atresia
613	Gastrointestinal / Renal	Pancreatitis

Paediatric Registry Diagnosis Code List

Diagnosis Code	Diagnosis Group	Diagnosis Description
614	Gastrointestinal / Renal	Peritonitis
615	Gastrointestinal / Renal	Pyloric Stenosis
616	Gastrointestinal / Renal	Short Gut Syndrome
617	Gastrointestinal / Renal	Ulcer - Duodenal
618	Gastrointestinal / Renal	Ulcer - Gastric or Gastritis
619	Gastrointestinal / Renal	Varices - Oesophageal or Gastric
620	Gastrointestinal / Renal	Biliary Atresia
621	Gastrointestinal / Renal	Bowel Perforation
622	Gastrointestinal / Renal	Hirschprung's Disease
623	Gastrointestinal / Renal	Neonatal Jaundice
624	Gastrointestinal / Renal	Oesophageal Foreign Body
625	Gastrointestinal / Renal	Portal Hypertension
626	Gastrointestinal / Renal	Previous Liver Transplant
627	Gastrointestinal / Renal	Volvulus
628	Gastrointestinal / Renal	Gastro Oesophageal Reflux
629	Gastrointestinal / Renal	Veno Occlusive Disease
630	Gastrointestinal / Renal	Chylous Effusion
700	Miscellaneous	Infection - Other
701	Miscellaneous	Adenovirus
702	Miscellaneous	Bacterium - Other
703	Miscellaneous	Bacterium - Gram Negative - Other
704	Miscellaneous	Bacterium - Gram Positive - Other
705	Miscellaneous	Candida
706	Miscellaneous	Clostridium
707	Miscellaneous	CMV
708	Miscellaneous	EBV
709	Miscellaneous	Enterovirus
710	Miscellaneous	Fungus - Other
711	Miscellaneous	Haemophilus Influenzae Type b
712	Miscellaneous	Hepatitis - Viral
713	Miscellaneous	Herpes Simplex Virus
714	Miscellaneous	HIV
715	Miscellaneous	Influenza Virus
716	Miscellaneous	Legionella (OBSOLETE)

719	Miscellaneous	Parainfluenzae Virus
720	Miscellaneous	Pertussis
721	Miscellaneous	Pneumococcus
722	Miscellaneous	Pneumocystis Carinii
723	Miscellaneous	Rotavirus
724	Miscellaneous	RSV
725	Miscellaneous	Salmonella
726	Miscellaneous	Staphylococcus (OBSOLETE)

Paediatric Registry Diagnosis Code List

Diagnosis Code	Diagnosis Group	Diagnosis Description
727	Miscellaneous	Streptococcus - Other
728	Miscellaneous	Varicella
729	Miscellaneous	Virus - Other
730	Miscellaneous	E Coli
731	Miscellaneous	Klebsiella
732	Miscellaneous	Malaria
733	Miscellaneous	Pseudomonas
734	Miscellaneous	Streptococcus Group B
735	Miscellaneous	Measles Virus
736	Miscellaneous	Staphylococcus - MRSA
737	Miscellaneous	Staphylococcus - Methicillin Sensitive
738	Miscellaneous	Tuberculosis
739	Miscellaneous	Aspergillosis
740	Miscellaneous	Human Metapneumovirus
741	Miscellaneous	Staphylococcus - Coagulase Negative
742	Miscellaneous	Enterobacter
743	Miscellaneous	Moraxella
744	Miscellaneous	Norovirus
745	Miscellaneous	Streptococcus Group A
746	Miscellaneous	Rhinovirus
747	Miscellaneous	Parechovirus
748	Miscellaneous	Suspected or Confirmed Pandemic Infection
799	Miscellaneous	No Organism Identified
800	Miscellaneous	Miscellaneous - Other
801	Miscellaneous	Acute Life Threatening Event
802	Miscellaneous	Cardiac Arrest - In Hospital
803	Miscellaneous	Cardiac Arrest - Out of Hospital
804	Miscellaneous	Chromosomal Anomaly
805	Miscellaneous	Coagulopathy
806	Miscellaneous	Dehydration
807	Miscellaneous	Dermatological Disorder
808	Miscellaneous	Diabetes Insipidus
809	Miscellaneous	Diabetes Mellitus with Ketoacidosis
810	Miscellaneous	Diabetes Mellitus without Ketoacidosis
811	Miscellaneous	Electrolyte Disorder
812	Miscellaneous	Endocrine Disorder
813	Miscellaneous	Gas Gangrene (OBSOLETE)
814	Miscellaneous	Home Ventilation Patient
815	Miscellaneous	Hypoglycaemia
816	Miscellaneous	ICU Diagnostic Monitoring - Elective
817	Miscellaneous	ICU Procedure
818	Miscellaneous	Immunodeficiency - Congenital
819	Miscellaneous	Immunosuppression - Acquired
820	Miscellaneous	Inborn Error of Metabolism

Paediatric Registry Diagnosis Code List

Diagnosis Code	Diagnosis Group	Diagnosis Description
821	Miscellaneous	Leukaemia or Lymphoma
822	Miscellaneous	Necrotising Fasciitis
823	Miscellaneous	Neutropenia
824	Miscellaneous	Pancytopenia
825	Miscellaneous	Phaeochromocytoma
826	Miscellaneous	Prematurity (<37/40 & 12mths of age)
827	Miscellaneous	Respiratory Arrest - In Hospital
828	Miscellaneous	Respiratory Arrest - Out of Hospital
829	Miscellaneous	Sepsis
830	Miscellaneous	Shock - Cardiogenic
831	Miscellaneous	Shock - Hypovolaemic
832	Miscellaneous	Shock - Septic
833	Miscellaneous	SIRS
834	Miscellaneous	Solid Neoplasm - Malignant
835	Miscellaneous	Solid Neoplasm - Non Malignant
836	Miscellaneous	Syndrome or Malformation
837	Miscellaneous	Toxic Shock Syndrome
838	Miscellaneous	Transplant - Bone Marrow
839	Miscellaneous	Craniosynostosis
840	Miscellaneous	Hydrops Fetalis
841	Miscellaneous	Neonate - Infant of Diabetic Mother
842	Miscellaneous	Neonate - IUGR
843	Miscellaneous	Previous Bone Marrow Transplant
844	Miscellaneous	Scoliosis
845	Miscellaneous	Tumor Lysis Syndrome
846	Miscellaneous	Wound Infection
847	Miscellaneous	Haematological Disorder
848	Miscellaneous	Organ Donor
849	Miscellaneous	Graft vs Host Disease
850	Miscellaneous	Cystic Hygroma
851	Miscellaneous	Respiratory Arrest - In ICU
852	Miscellaneous	Cardiac Arrest - In ICU
853	Miscellaneous	Down Syndrome
854	Miscellaneous	Velo Cardio Facial Syndrome (22q11.2)
855	Miscellaneous	Diabetes (comorbidity)
856	Miscellaneous	SIADH
857	Miscellaneous	Acid-Base Disorder
858	Miscellaneous	DIC (Disseminated Intravascular Coagulation)
859	Miscellaneous	Mitochondrial Disorder
860	Miscellaneous	Osteomyelitis
861	Miscellaneous	Rhabdomyolysis
862	Miscellaneous	Anorexia Nervosa
863	Miscellaneous	Behavioural Disorder
864	Miscellaneous	Failure to Thrive

Paediatric Registry Diagnosis Code List

Diagnosis Code	Diagnosis Group	Diagnosis Description
865	Miscellaneous	Skeletal Dysplasia
866	Miscellaneous	Multi Organ Failure
867	Miscellaneous	Obesity/Morbid Obesity
901	Miscellaneous	Cardioversion / Defibrillation (OBSOLETE)
902	Miscellaneous	Dialysis - Haemo (Intermittent) (OBSOLETE)
903	Miscellaneous	Dialysis - Peritoneal (OBSOLETE)

906	Miscellaneous	High Frequency Oscillation (OBSOLETE)
907	Miscellaneous	Plasma Filtration (OBSOLETE)
908	Miscellaneous	Ventricular Assist Device (OBSOLETE)
909	Miscellaneous	Inhaled Nitric Oxide (OBSOLETE)
1100	PostOp - Other	Post Procedure - Other
1101	PostOp - Other	Anaesthetic Complication
1102	PostOp - Cardiac	Cardiac Catheter
1103	PostOp - Other	Ex-prem- Post GA
1104	PostOp - Other	Invasive Radiology Procedure
1105	PostOp - Other	Massive Intraop Transfusion
1106	PostOp - Cardiac	Cardiac Catheter - Balloon Septostomy
1107	PostOp - Cardiac	Cardiac Catheter - Interventional
1108	PostOp - Other	Post operative bleeding
1109	PostOp - Other	PEG (Percutaneous Endoscopic Gastrostomy)
1110	PostOp - Other	Surgical Complication
1300	PostOp - Neurosurgical	Neurosurgery - Other
1301	PostOp - Neurosurgical	Craniotomy - Anterior Fossa
1302	PostOp - Neurosurgical	Craniotomy - Posterior Fossa
1303	PostOp - Neurosurgical	CSF Shunt Insertion or Revision
1304	PostOp - Neurosurgical	Decompression - Cranial
1305	PostOp - Neurosurgical	Decompression - Spinal Cord
1306	PostOp - Neurosurgical	Hemispherectomy or Lobectomy
1307	PostOp - Neurosurgical	ICP Monitor or Vent. Drain Insertion
1308	PostOp - Neurosurgical	Intracranial Haematoma Evacuation
1309	PostOp - Neurosurgical	Myelomeningocele Repair
1310	PostOp - Neurosurgical	Decompression - Craniocervical
1311	PostOp - Neurosurgical	Third Ventriculostomy
1400	PostOp - General/Thoracic	Thoracic Surgery - Other
1401	PostOp - General/Thoracic	Diaphragm Plication
1402	PostOp - General/Thoracic	Diaphragm Repair
1403	PostOp - General/Thoracic	Lung Biopsy
1404	PostOp - General/Thoracic	Lung Decortication
1405	PostOp - General/Thoracic	Oesophageal Atresia Repair
1406	PostOp - General/Thoracic	Pneumonectomy or Lobectomy
1407	PostOp - General/Thoracic	Thoracic Tumour Resection
1408	PostOp - General/Thoracic	Tracheo-oesophageal Fistula Repair

Paediatric Registry Diagnosis Code List

Diagnosis Code	Diagnosis Group	Diagnosis Description
1409	PostOp - General/Thoracic	Tracheopexy
1410	PostOp - General/Thoracic	Thoracoscopy
1411	PostOp - General/Thoracic	VATS procedure
1500	PostOp - ENT	ENT - Other
1501	PostOp - ENT	Adenoidectomy and/or Tonsillectomy
1502	PostOp - ENT	Choanal Atresia Repair
1503	PostOp - ENT	Cricoid Split
1504	PostOp - ENT	Laryngeal Reconstruction
1505	PostOp - ENT	Laryngobronchoscopy
1506	PostOp - ENT	Tracheostomy
1507	PostOp - ENT	Retropharyngeal Abscess Drainage
1508	PostOp - ENT	Laryngoplasty
1509	PostOp - ENT	Tracheal Reconstruction / Tracheoplasty
1510	PostOp - ENT	Dilatation of Airway
1511	PostOp - ENT	Laryngeal Cleft Repair
1600	PostOp - General/Thoracic	General Surgery - Other
1601	PostOp - General/Thoracic	Abdominal Tumour Resection
1602	PostOp - General/Thoracic	Appendicectomy
1603	PostOp - General/Thoracic	Bladder Extrophy Repair
1604	PostOp - General/Thoracic	Burns Surgery
1605	PostOp - General/Thoracic	Fundoplication
1606	PostOp - General/Thoracic	Gastroschisis or Exomphalos Repair
1607	PostOp - General/Thoracic	GI Endoscopy and/or Sclerotherapy
1608	PostOp - General/Thoracic	Intussusception Repair
1609	PostOp - General/Thoracic	Kasai
1610	PostOp - General/Thoracic	Laparotomy - Other
1611	PostOp - General/Thoracic	Transplant - Kidney
1612	PostOp - General/Thoracic	Transplant - Liver
1613	PostOp - General/Thoracic	Transplant - Small Bowel
1614	PostOp - General/Thoracic	Urogenital Surgery - Other
1615	PostOp - General/Thoracic	Laparotomy - Bowel Obstruction
1616	PostOp - General/Thoracic	Laparotomy - Bowel Perforation
1617	PostOp - General/Thoracic	Laparotomy - GI Haemorrhage
1618	PostOp - General/Thoracic	Laparotomy - Necrotising Enterocolitis
1619	PostOp - General/Thoracic	Laparotomy - Peritonitis
1620	PostOp - General/Thoracic	Laparotomy - Trauma
1621	PostOp - General/Thoracic	Abdominal Aorta Surgery
1622	PostOp - General/Thoracic	Wound Debridement
1623	PostOp - General/Thoracic	Laparoscopic Surgery
1700	PostOp - Other	Craniofacial Surgery - Other
1701	PostOp - Other	Cranial Vault Reshaping
1702	PostOp - Other	Dental Surgery
1703	PostOp - Other	Facial Cleft Repair
1704	PostOp - Other	Mandibular Mobilisation

Paediatric Registry Diagnosis Code List

Diagnosis Code	Diagnosis Group	Diagnosis Description
1705	PostOp - Other	Midface Mobilisation
1706	PostOp - Other	Cleft Palate Repair
1800	PostOp - Other	Orthopaedic Surgery - Other
1801	PostOp - Other	Fracture Fixation
1802	PostOp - Other	Spinal Instrumentation
1901	PostOp - Cardiac	ASD surgery (including ASD secundum; sinus venosus ASD, Patent Foramen Ovale Closure) (RC 1)
1902	PostOp - Cardiac	Aortopexy (RC 1)
1903	PostOp - Cardiac	PDA surgery >30d of age (RC 1)
1904	PostOp - Cardiac	Coarctation repair >30d of age (RC 1)
1905	PostOp - Cardiac	Partially anomalous pulmonary venous connection surgery (RC 1)
1906	PostOp - Cardiac	Aortic valvotomy - valvuloplasty >30d of age (RC 2)
1907	PostOp - Cardiac	Subaortic stenosis resection (RC 2)
1908	PostOp - Cardiac	Pulmonary valvotomy – valvuloplasty (RC 2)
1909	PostOp - Cardiac	Pulmonary valve replacement (RC 2)
1910	PostOp - Cardiac	Right ventricular infundibulectomy (RC 2)
1911	PostOp - Cardiac	Pulmonary outflow tract augmentation (RC 2)
1912	PostOp - Cardiac	Repair of coronary AV fistula (RC 2)
1913	PostOp - Cardiac	ASD and VSD repair (RC 2)
1914	PostOp - Cardiac	ASD primum repair (RC 2)
1915	PostOp - Cardiac	VSD repair (RC 2)
1916	PostOp - Cardiac	VSD closure and pulmonary valvotomy or infundibular resection (RC 2)
1917	PostOp - Cardiac	VSD closure and pulmonary artery band removal (RC 2)
1918	PostOp - Cardiac	Repair of unspecified septal defect (RC 2)
1919	PostOp - Cardiac	Total repair of tetralogy of Fallot (RC 2)
1920	PostOp - Cardiac	Repair of total anomalous pulmonary veins >30d of age (RC 2)
1921	PostOp - Cardiac	Glenn shunt (RC 2)
1922	PostOp - Cardiac	Vascular ring surgery (RC 2)
1923	PostOp - Cardiac	Repair of AP window (RC 2)
1924	PostOp - Cardiac	Coarctation repair ≤30d of age (RC 2)
1925	PostOp - Cardiac	Repair of pulmonary artery stenosis (RC 2)
1926	PostOp - Cardiac	Transection of pulmonary artery (RC 2)
1927	PostOp - Cardiac	Common atrium closure (RC 2)
1928	PostOp - Cardiac	Left ventricular to right atrial shunt repair (RC 2)
1929	PostOp - Cardiac	Aortic valve replacement (RC 3)
1930	PostOp - Cardiac	Ross procedure (RC 3)
1931	PostOp - Cardiac	Left ventricular outflow tract patch (RC 3)
1932	PostOp - Cardiac	Ventriculomyotomy (RC 3)
1933	PostOp - Cardiac	Aortoplasty (not arch repair or graft) (RC 3)
1934	PostOp - Cardiac	Mitral valvotomy – valvuloplasty (RC 3)
1935	PostOp - Cardiac	Mitral valve replacement (RC 3)
1936	PostOp - Cardiac	Valvectomy of tricuspid valve (RC 3)

Paediatric Registry Diagnosis Code List

Diagnosis Code	Diagnosis Group	Diagnosis Description
1937	PostOp - Cardiac	Tricuspid valvotomy – valvuloplasty (RC 3)
1938	PostOp - Cardiac	Tricuspid valve replacement (RC 3)
1939	PostOp - Cardiac	Tricuspid valve repositioning for Ebstein anomaly >30d of age (RC 3)
1940	PostOp - Cardiac	Repair anomalous coronary artery without intrapulmonary tunnel (RC 3)
1941	PostOp - Cardiac	Repair anomalous coronary artery with intrapulmonary tunnel (Takeuchi) (RC 3)
1942	PostOp - Cardiac	Closure of semilunar valve - aortic or pulmonary (RC 3)
1943	PostOp - Cardiac	Right ventricular to pulmonary artery conduit (RC 3)
1944	PostOp - Cardiac	Left ventricular to pulmonary artery conduit (RC 3)
1945	PostOp - Cardiac	Repair of double-outlet right ventricle with or without repair of right ventricular obstruction (RC 3)
1946	PostOp - Cardiac	Fontan procedure (RC 3)
1947	PostOp - Cardiac	Repair of transitional or complete atrioventricular canal with or without valve replacement (RC 3)
1948	PostOp - Cardiac	Pulmonary artery banding (RC 3)
1949	PostOp - Cardiac	Repair of tetralogy of Fallot with pulmonary atresia (RC 3)
1950	PostOp - Cardiac	Repair of cor triatriatum (RC 3)
1951	PostOp - Cardiac	Systemic to pulmonary artery shunt (RC 3)
1952	PostOp - Cardiac	Atrial switch operation (RC 3)
1953	PostOp - Cardiac	Arterial switch operation (RC 3)
1954	PostOp - Cardiac	Reimplantation of anomalous pulmonary artery (RC 3)
1955	PostOp - Cardiac	Annuloplasty (RC 3)
1956	PostOp - Cardiac	Repair of coarction and VSD closure (RC 3)
1957	PostOp - Cardiac	Excision of intracardiac tumour (RC 3)
1958	PostOp - Cardiac	Aortic valvotomy - valvuloplasty ≤30d of age (RC 4)
1959	PostOp - Cardiac	Konno procedure (RC 4)
1960	PostOp - Cardiac	Repair of complex anomaly (single ventricle) by VSD enlargement (RC 4)
1961	PostOp - Cardiac	Total repair of anomalous pulmonary veins ≤30d of age (RC 4)
1962	PostOp - Cardiac	Atrial septectomy (RC 4)
1963	PostOp - Cardiac	Repair of transposition-VSD sub PS (Rastelli) (RC 4)
1964	PostOp - Cardiac	Atrial switch operation with VSD closure (RC 4)
1965	PostOp - Cardiac	Atrial switch operation with repair of sub PS (RC 4)
1966	PostOp - Cardiac	Arterial switch operation with pulmonary artery band removal (RC 4)
1967	PostOp - Cardiac	Arterial switch operation with VSD closure (RC 4)
1968	PostOp - Cardiac	Arterial switch operation with repair of sub PS (RC 4)
1969	PostOp - Cardiac	Repair of truncus arteriosus (RC 4)
1970	PostOp - Cardiac	Repair of hypoplastic or interrupted arch without VSD closure (RC 4)
1971	PostOp - Cardiac	Repair of hypoplastic or interrupted arch with VSD closure (RC 4)
1972	PostOp - Cardiac	Transverse arch graft (RC 4)

Paediatric Registry Diagnosis Code List

Diagnosis Code	Diagnosis Group	Diagnosis Description
1973	PostOp - Cardiac	Unifocalization for tetralogy of Fallot – pulmonary atresia (RC 4)
1974	PostOp - Cardiac	Double switch (RC 4)
1975	PostOp - Cardiac	Tricuspid valve repositioning for neonatal Ebstein ≤30d of age (RC 5)
1976	PostOp - Cardiac	Repair of truncus arteriosus and interrupted arch (RC 5)
1977	PostOp - Cardiac	Stage 1 repair of hypoplastic left heart syndrome (Norwood) (RC 6)
1978	PostOp - Cardiac	Stage 1 repair of non-hypoplastic left heart syndrome conditions (RC 6)
1979	PostOp - Cardiac	Damus-Kaye-Stansel procedure (RC 6)
